# GPO

## Fond d'écran

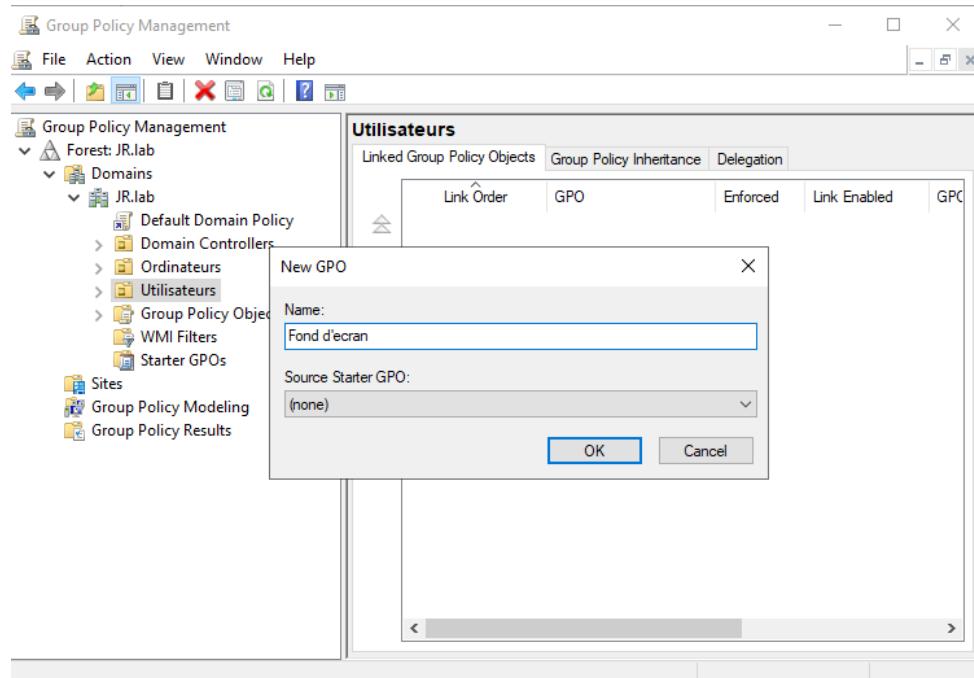

Jocelin Rey

Crée un dossier partager où se trouvera votre image de fond. Partagé votre dossier avec les ordinateurs du domaine (plus secure).

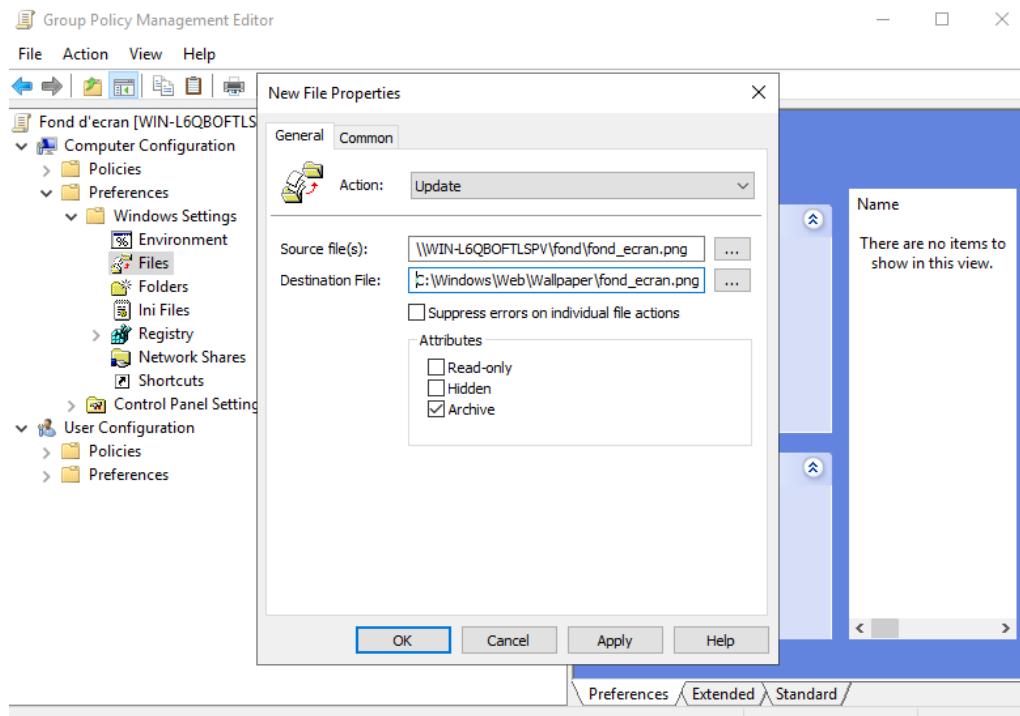

Crée une nouvelle GPO

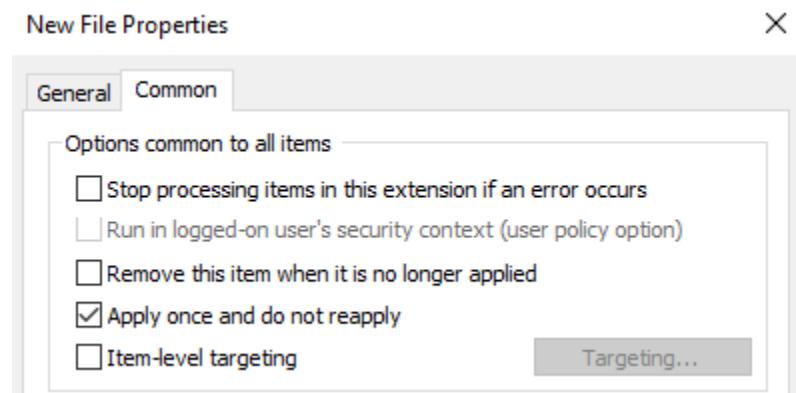

Mettre le chemin du fond écran source et destination

Windows stock ces fond d'écran dans le dossier :

« C:\Windows\Web\Wallpaper\wallpaper.png »

Dans l'onglet commun faire appliquer une seul fois

Maintenant on va appliquer le fond d'écran

Supported on: At least Windows 2000

Options: Help:

Wallpaper Name: C:\Windows\Web\Wallpaper\fond-eclar

Example: Using a local path: C:\windows\web\wallpaper\home.jpg

Example: Using a UNC path: \\Server\Share\Corp.jpg

Wallpaper Style: Center

Specifies the desktop background ("wallpaper") displayed on all users' desktops.

This setting lets you specify the wallpaper on users' desktops and prevents users from changing the image or its presentation. The wallpaper you specify can be stored in a bitmap (\*.bmp) or JPEG (\*.jpg) file.

To use this setting, type the fully qualified path and name of the file that stores the wallpaper image. You can type a local path, such as C:\Windows\web\wallpaper\home.jpg or a UNC path, such as \\Server\Share\Corp.jpg. If the specified file is not available when the user logs on, no wallpaper is displayed. Users cannot specify alternative wallpaper. You can also use this setting to specify that the wallpaper image be centered, tiled, or stretched. Users cannot change this specification.

If you disable this setting or do not configure it, no wallpaper is displayed. However, users can select the wallpaper of their choice.
